

ACADEMIC INTERNSHIPS WITH THE MONTEVERDE INSTITUTE (MVI)

MODULES AND PRICES

General Academic Module Information: Students may choose if they would like to take academic modules and which during their internship, as well as decide whether or not they would like to take a Spanish course. For students who will be doing homestays, the Spanish course is strongly recommended.

Note: Five modules contribute to overall internship credits.

Modules: [est. contact hours, 15 lecture for 5 modules] *recommended credits, 1*

Spanish course: [est. contact hours, 30 lecture/discussion] *recommended credits, 2*

Internship, no modules: [est. contact hours, 30 lab/30 discussion] *recommended credits, 3*

Lichenology II: Advanced Concepts	3
Biological Corridors and Current Threats to Local Wildlife	3
Permaculture: Introduction, Concepts of Design and Practices	3
Introduction to Journalism	3

Recommended Team Internship modules: Students who have chosen to participate in team internships should take these modules:

1. Monteverde History and Culture
2. Structured Decision Making Process (Overview)
3. Group dynamics and conflict resolution
4. Research methodology
5. Introduction to the statistical package “R”

Spanish course: During the Spanish course, students will practice their speaking skills, grow their Spanish vocabularies, learn new grammatical structures, and ultimately improve their overall management of the Spanish language. In addition, students will learn more about Costa Rican culture, including food, mannerisms, sayings, traditions, and lifestyle. Past students have found that the Spanish course greatly increases their ability to communicate with their homestay families, make local acquaintances and friends, and participate in community events or lectures that are only given in Spanish.

Pricing: All internship prices include homestay, in-country transportation, and project fees.

Courses

Modules (5): \$750
